

Max-Prop Easy: A great choice for a wide range of boats

The MAX PROP EASY is a true step forward in MAX PROP design. The ease of installation and simple pitch adjustment make this model a great choice for a wide range of boats. This design provides smooth and efficient power. Available in 2, 3 and 4 blade models.

Available from 12" to 47" diameters for shafts 1" to 3" or metric equivalent also available for Sail Drive applications.

Adjustable pitch

- Average sailing speed increased by around 15%
- Newer blade and hub design
- Average sailing speed increased by around 15%
- Great forward power in all conditions
- Improved reverse, manoeuvrability and stopping power
- Externally adjustable pitch
- One piece installation (can be done easily by a diver so no need for a haul out)

Just like other Max-Prop propellers, the Easy model feathers to a low drag position while sailing. Under sail the Max-Prop will increase average sailing speed by around 15%, the largest difference being noticed when sailing in light airs.

In forward drive the Max-Prop will offer near to fixed propeller performance. The Max-Prop utilizes the same leading edge in forward as it does in reverse giving the propeller the same thrust in both directions dramatically improving control and power in reverse.

The installation of the Max-Prop Easy is very simple. The propeller is delivered

Ideal for long range and local cruiser yachts

assembled. Just slip the hub on the shaft, secure the nut, lock screws and fit the anode. As with all Max-Prop propellers the Easy model is pitch adjustable. This can be done in the water as the propeller does not need to be disassembled to change the pitch. Should you want to tweak the pitch settings to 'fine tune' your engine loadings you can. Simply swap between pitch screws provided - these alter the pitch in 2 degree increments.

MAX-PROP

AUTOMATIC FEATHERING PROPELLERS

Acclaim for Max-Prop:

“We can now trundle along most satisfactorily in 5-10 kts when we would hardly have been moving before. The Max-Prop feathers very easily and is better astern than my old fixed prop”.

Edward Ferris - Sole Bay 35 motor-sailer fitted with a 22", 4 bladed generation 2, Maxprop EASY
